About Us

Sphere Sport is a sports apparel manufacturer based in Dongguan, China. Our founders, Sam Clay and Eric Fan, bring a unique blend of Australian and Chinese culture to our business, creating a dynamic and innovative approach to sports apparel production.

We specialize in sublimation printing, a process that allows us to print vibrant and long-lasting designs on our high-quality fabrics. Our dedication to using only the best materials and equipment ensures that our products are not only stylish but also durable and comfortable.

We believe that customer satisfaction is of utmost importance, and that's why we place a high emphasis on customer service. Our team is committed to working closely with our clients to understand their specific needs and create customized solutions that meet their unique requirements.

Kit Bags	45 - 46

The bulk of the cricket bat's willow comes from willow specialists but each cleft is still selected by lead bat maker, individually. The cleft has already been split from the round using a wooden wedge, rough sawn and the ends waxed to stop splitting. The process of seasoning in the open air takes place to reduce moisture content and this takes between nine months and a year. When ready to be turned into bats the ends are cut and they pass through a five cutter milling machine to give the cleft a uniform shape.

STEP 1 FITTING THE HANDLE

Each bat handle is spliced and fitted using a flexible wood glue making sure it is set slightly forward to ensure the perfect line of the bow. The handle is then gently tapped into place and left to dry in an upright position.

STEP 2 SHAPING THE BLADE

Our bats are shaped firstly using a traditional draw knife then various wooden block planes and spoke shaves to ensure the shape is pleasing to the bat maker, thus ensuring the perfect weight, balance and pick up in every bat we produce.

STEP 3 SHAPING THE SHOULDERS AND HANDLE

The shoulders are shaped and blended firstly with the skilful use of a draw knife and then finished with a traditional rounded spoke shave. Each handle is then painstakingly shaped with a rasp to ensure the shape fits perfectly in the hands of the batsman.

STEP 4 SANDING

Once the bat has been shaped and blended the sanding process begins. This is a time consuming process that uses several grades of paper working to a fine finish. Finally brush sanders are used to give a beautiful smooth finish.

STEP 5 BINDING

Our bats are bound on the lathe using a four ply cotton yard. Glue is spread on the handle prior to the binding in order to ensure that the binding is held in place for the life of the bat handle. The handle is then left to dry for a few hours.

STEP 6 POLISHING

Using a loose leaf polishing mop on the outboard side of the binding lathe we polish each bat meticulously to give a rich satin finish that is the envy of other bat makers. Toe guards are then fitted unless specified otherwise.

STEP 7 LABELING, GRIPPING, & KNOCKIN-IN

The Woodstock bat is then ready for labelling, gripping and knocking in. Every bat also receives a final check-over to ensure that it has been finished to a high standard and that there are no previously unspotted imperfections.

STEP 8 LET'S PLAY CRICKET!

The bat is finished and ready to grace cricket grounds around the world!

Most customers will of course look for the higher grades available in the price range they are looking at. However, is this a crucial factor in terms of selection ?

GRADING- THE WILLOW SELECTION

When selecting your new bat - the grade of timber is most likely going to be considered, however finding out the differences can be quite difficult - JS Wright & Sons offer the following guidelines -

Grade 1

A Grade 1 is the best-looking blade, though it will not necessarily play the best. There may be some red wood evident on the edge of the blade. The grain on the face will be straight and there will be a minimum of 6 grains visible. There may be the odd small knot or speck in the edge or back, but the playing area should be clean.

Grade 2

A Grade 2 blade is also very good quality and normally a larger amount of red wood can be seen on the edge of a blade, this has no effect on the playing ability of the bat it is purely cosmetic. Again, there will be at least 6 straight grains on the face of the blade with maybe some blemishes, pin knots or "speck" visible, we also put the top 2% of the excellent quality butterfly blades that we get into Grade 2.

Grade 3

This is a middle grade that is produced in much higher numbers than the top grades and it offers very good value for money. A Grade 3 Blade has up to half colour across the blade which again has no direct relation to the playing ability of the wood, it just has less visual attraction. There will be a minimum of 5 grains on the face of the blade which may not always be perfectly straight. Again, some small knots or butterfly stain may be present with sometimes more prominent "speck".

Grade 4

A Grade 4 Blade is normally over half colour or contains butterfly stain. It will still play as well as the other grades. Any number of grains are possible with often only 4 grains, the willow containing 'butterfly' stain is very strong, there could also be more "speck" and other faults.

Grade 1

Grade 2

Grade 3

Grade 4

Grains - The number and width

What should you look for when selecting a bat? This question is by far the most common question we are asked when helping customers choose their new English Willow bat in our shops. There are a few common things we look for when helping our customers choose their new cricket bat - Number of Grains, width of grains, appearance of any redwood, or knots - and the consistency of the willow.

Most of our "top end" cricket bats will offer amazing consistency in terms of the number of grains, the distance they are spaced out, the lack of any major blemishes, and usually minimal if any at all appearance of redwood. This will offer a superb playing surface which is very consistent and usually will play very nicely.

However, as JS Wright & Sons mention on their website, this is not always something which every player must look for when choosing a new English Willow cricket bat. JS Wright & Sons offer the following information which might help choosing your new English Willow cricket bat -

OTHER GRADES AND WHAT MAKES A GOOD BAT?

We have many other Grades which have been developed over the years to satisfy the different demands from all the different markets across the world.

Ques1: "What makes a good bat?"

Ans1: It depends on the taste of the customer and the skill of the bat maker. A bat should always be chosen on "feel" and not merely what it looks like. There are bound to be some small knots or blemishes on the bat, after all it is a natural product and cannot be expected to be perfect, with no faults at all.

The only main differences in the grade are the visual appearance of the wood including amounts of butterfly stain plus the number of blemishes or knots on the blade and the straightness of the grain. Generally, the more color in the blade the lower the grade, there is however negligible difference in the playing ability, it is purely a perception that if it looks good it will play well, this is not the case.

Butterfly stain (the stain resembles the shape of a butterfly), for example, used to be very popular for its superior strength and playing ability. Unfortunately, these days because it does not "look clean and white" people do not buy it. It does make very good bats that are very strong and perform well.

THE WIDE GRAIN MYTH

Generally, we would expect a blade to have wide grain if it has less than 6 grains on the face. The width of the grain is entirely dependent upon how fast the tree has grown; each grain represents one year's growth. The factors that affect the rate of growth are the soil quality and amount of water available.

A narrow grain bat will certainly play well, quicker, but will not have a particularly long life.

On the other hand, a wider grain bat (with as little as 4 grains on the face) will play as well. The reason for this is that the wood is not as old, so it is stronger and will stand up better to the beating with some of the very hard balls used in matches.

KASHMIR WILLOW BATS

SUPREMO

SLS/CR/SUP/100

- Selected Kashmir Willow **Grade 1**
- Hard Pressed & Traditionally Shaped for Superb Strokes.

BALANCED
POWER
PICKUP

- Embossed Chrome Sticker with High quality grip

CRICKET BALLS

CRICKET BALLS

BATTING PROTECTION EQUIPMENT

Elevate your game and protect yourself with our premium range of Batting Protection Equipment designed for ultimate Performance and Safety on the pitch.

BATTING GLOVES

BATTING LEGGUARDS

BATTING LEGGUARD

Super Batting Legguard

SLS/CR/SBL/100

- Premium quality imported polyurethane facing.
- Cotton filled knee rolls with a layer of high density foam reinforcement.
- High-density sponge filled vertical bolster with TPU insert for knee protection.
- Extra high-density foam filling in the side wings.
- Extra butterfly straps for the right fit.
- Comes with padded straps & added protection on top hat.

Universal Batting Legguard

SLS/CR/UBL/200

- 7 cane construction with unique hinged side wing for ease of movement
- Top quality Korean PU front
- Unique padded knee socket protective insert of hard fiber
- Embossed-stitched PU panels quilted through knee
- Double V straps to pull the pad tighter as per your requirement
- Perforated PVC instep

Ultra Lite Batting Legguard

SLS/CR/LBL/300

- Unique shape light weight EVA pre moulded pad with Korean PU front
- Pad provides compact and round shape
- Triple vertical internal bolster gives great protection and flexibility
- Strong knee socket for extra knee protection

Gravity Batting Legguard

SLS/CR/GBL/400

- Light weight and molded construction
- Compact and round shape
- High density foam facing
- Strap filled with pull tab for easy release

BATTING LEGGUARD

Impact Batting Legguard

SLS/CR/IBL/500

- 7 cane construction with unique hinged side wing for ease of movement
- Top quality PU front
- Unique padded knee socket protective insert of hard fiber
- Embossed-stitched PU panels quilted through knee
- Double V straps to pull the pad tighter as per your requirement
- Perforated PVC instep

Club Batting Legguard

SLS/CR/CBL/600

- Made from premium quality imported polyurethane facing
- High-density sponge filled vertical bolster with TPU insert for knee protection
- Extra high density foam filling in the side wings
- Comes with padded straps
- Mesh instep with hard-wearing piping
- Added protection on top hat

Nexon Batting Legguard

SLS/CR/NBL/700

- PVC front
- Cotton filling in bars
- Single vertical bolsters filled with low density sheet
- Tetron instep

Practice Batting Legguard

SLS/CR/PBL/800

- PVC front
- Cotton filling in bars
- Single vertical bolsters filled with low density sheet
- Tetron instep

BATTING GLOVES

Opener Batting Gloves

SLS/CR/OBG/100

- Introducing first in segment all-finger fiber protection cricket gloves with patented "Armour Technology" that gives you an extra edge and next level advanced protection.
- Also, these gloves come with fully ventilated construction with nylon gusset along sides that provides airing and sweat reduction over extended use

Super Club Batting Gloves

SLS/CR/CSG/200

- Palm made from premium quality leather
- Split thumb for extra-flex; three-piece sidebar on bottom hand for extra protection from those waybard balls
- Fully ventilated finger construction with nylon gusset along sides that provides airing and sweat reduction over extended use

Smasher Batting Gloves

SLS/CR/SBG/300

- Palm made from Premium Quality leather.
- Extra finger protection reinforced with a thermoplastic polyurethane insert in the first two fingers of the lead hand.
- Three-piece sidebars on lead hand.
- Leather tabs on fingertips.

Hi - Tech Batting Gloves

SLS/CR/HBG/400

- Palm made from premium quality leather manufactured by best Pittard
- Split thumb for extra-flex; three-piece sidebar on bottom hand for extra protection from those wayward balls
- Fully ventilated finger construction with nylon gusset along sides that provides airing and sweat reduction over extended use

BATTING GLOVES

Majesty Batting Gloves

SLS/CR/MBG/500

- Multi flex points construction for better movement of the hands
- Superior supple leather palm for better grip and feel
- High-quality PVC and low-density foam in finger rolls
- Airflow gusset for optimum ventilation

Supernova Batting Gloves

SLS/CR/SBG/600

- Multi flex points construction for better movement of the hands
- Superior supple leather palm for better grip and feel
- High-quality PVC and low-density foam in finger rolls
- Airflow gusset for optimum ventilation

Signature Batting Gloves

SLS/CR/PBG/700

- Palm made from premium quality cotton with a leather patch for better grip
- Fully ventilated finger construction with cotton gusset along sides that provides airing and sweat reduction over extended use
- Color may vary
